

CUSTOMER STORIES

WORLD'S TOP EV MAKER TAPS US FOR PARTS —AND THEN EXPANDS THE PARTNERSHIP FURTHER

Understanding the realities of manufacturing high-performance components helped us achieve more together

CHALLENGE

After finding an optimal component for their battery management system, the world's top EV manufacturer sought a way to further improve the efficiency of their assembly line and lower costs. Their engineers contacted Isabellenhütte to determine how to further leverage our expertise.

SOLUTION

Isabellenhütte proposed that we engineer, create and deliver a pre-built, multi-component assembly that would still meet their rigorous quality, cost, and performance requirements.

Tapping in-house and experienced third-party resources within the automotive sector, we put together a best-of-breed assembly that gave our customer a time- and labor-saving turnkey solution—at a cost that made it a compelling business “win” for them.

APPLICATION

Battery management sub-assembly for EVs: More than 200,000 assemblies shipped (to-date) for the world's top EV manufacturer.
