***Digi-Key Electronics finalizes New Distribution Partnership with Isabellenhütte USA***

**The world's premier electronics distributor, Digi-Key Electronics, has announced a global distribution partnership with Isabellenhütte USA, to offer their full range of precision measurement solutions and precision and power resistors to customers around the world.**

Renowned by engineers for top-tier quality and 500 years of innovation, Isabellenhütte is continually expanding the boundaries of what's possible for companies at the forefront of automotive electronics /electric vehicles, aerospace, industrial equipment, medical devices, and renewable energy. Their solutions are typically incorporated into next generation designs where new thresholds of performance are required.

Digi-Key's offering will encompass the full catalog of off-the-shelf Isabellenhütte products, including components for battery management systems, power grids, vehicle electrification, drones and UAVs, industrial equipment, and more.

"Signing a partnership with the world's largest distributor of ready-to-ship electronic components is a major step forward for our company," said Uwe Keller, Managing Director of Isabellenhütte USA. "Being able to offer customers the convenience and supply-chain confidence that Digi-Key delivers will really accelerate our ability to reach the broadest market possible with uncompromising products," Keller said. "Our motto to customers is to 'Expect more' from Isabellenhütte, and we believe our Digi-Key partnership will extend that invitation even further."

"We are pleased to welcome Isabellenhütte to the Digi-Key Marketplace," said "Jason Simoneau, Director, Passives." "Their long history of excellence in metallurgy has enabled them to create the kind of products that provide value in the marketplace and help their customers design leading edge technology."

In addition to being incorporated into some of the country's largest EV programs, components from Isabellenhütte are routinely on-board projects, from record-setting electric dragsters and deep space missions to global appliance and medical device releases.
